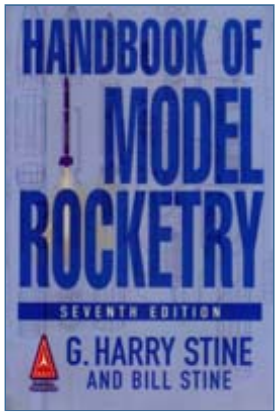
Руководство по моделям ракет



The classic guide by the "father of model rocketry" revised and updated for the twenty-first century.
The "bible of modern rocketry" shows you how to safely build, launch, track, and recover model rockets — just as the experts do it! Whether you're a beginner or a veteran model rocketeer, the Handbook of Model Rocketry explains everything you need to know to get your rocket off the ground — from rocket construction and ignition systems to launching techniques, aerodynamics, altitude determinations, and recovery devices. G. Harry Stine's son. Bill Stine, covers all the latest changes to the hobby since the last edition was published. This authoritative guide, the official manual of the National Association of Rocketry, provides the expertise you need to launch your rocket skyward.

G. HARRY STINE was the founder and one-time president of the National Association of Rocketry. An engineer, science writer, and author, Stine also started the first model rocket company, whose kits are now in the Smithsonian. His son, BILL STINE, is a model rocket expert in his own right and is the founder and President of Quest Aerospace Inc.

СОДЕРЖАНИЕ

Preface to the Seventh Edition [ix]
Preface to the First Edition [xi]

1. This Is Model Rocketry [1]
2. Getting Started [13]
3. Tools and Techniques in the Workshop [25]
4. Model Rocket Construction [45]
5. Model Rocket Motors [64]
6. Ignition and Ignition Systems [82]
7. Launchers and Launching Techniques [98]
8. How High Will It Go? [111]
9. Stability [128]
10. Model Rocket Aerodynamics [143]
11. Multistage Model Rockets [159]
12. Recovery Devices [174]
13. Glide Recovery [190]
14. Building and Flying Large Models [221]
15. Payloads [232]
16. Scale Models [247]
17. Altitude Determination [266]
18. Model Rocket Ranges [283]
19. Clubs and Contests [298]
20. Where Do I Go from Here? [308]

Epilogue [317]

Bibliography [319]

Appendix I: Important Addresses [321]
Appendix II: Model Rocket CP Calculation [323]
Appendix III: Rocket Altitude Simulation: Computer Program RASP-93 [325]
Appendix IV: Static Stability Calculation: Computer Program STABCAL-2 [331]
Appendix V: The Triple-Track Tracker [337]
Appendix VI: Two-Station Alt-Azimuth Tracking Data Reduction Program MRDR-2 [343]

Appendix VII: Three-Station Elevation-Angle-Only Tracking Data Reduction Tables [345]
Appendix VIII: Sample NAR Section Bylaws [349]

Index [353]
